

Training Peers to Support Clients in HIV Care and Treatment

December 9, 2010

Introducing...Building Blocks to Peer Success

PEER Center
Peer Education & Evaluation Resource Center

Boston University School of Public Health

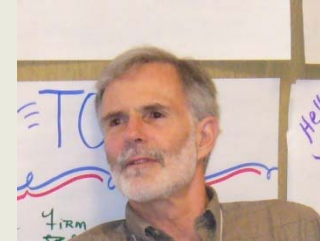

Objectives

- Learn how to access web-based peer training curricula and planning resources;
- Identify key core competencies for training HIV+ peers; and
- Describe how to develop a training plan for HIV+ peers.

Agenda

- Welcome – John Ruiz
- Introduction to the Project: Bill Bower
- Review the Toolkit Guide and Training Modules:
Carol Tobias
- Bringing it All Together – Jeopardy: Bill Bower
- Designing a Training: John Ruiz
- Questions & Discussion
- Evaluation

Minority AIDS Initiative/HRSA: Peer Education Training Sites & Resource Evaluation Center

- To improve HIV-related health outcomes for communities of color and reduce health disparities through HIV peer education by:
 - Training HIV peer educators on HIV care, treatment and support
 - Replicating successful peer education programs through training-of-trainers
 - Building capacity in existing HIV/AIDS peer programs or in organizations developing a peer program

Building Blocks to Peer Success

A toolkit for training HIV-positive peers to engage PLWHA in care

Purpose of this toolkit: to support the training of HIV-positive peers who work to engage and retain people living with HIV in health care.

Primary audiences: experienced trainers and training organizations who can use this toolkit to design, enhance or refine their own training of peers.

Additional uses: Peer supervisors or program directors can use this toolkit to plan a peer training program for newly hired peers or provide continuing education for existing peers.

Toolkit Modules

This toolkit is separated into general categories in order to allow easy access to the large volume of information being presented. All of the individual modules are made to stand alone and include detailed instructions as well as the time, materials, and preparation needed for each module. When selecting modules for your training, it maybe useful to get a synopsis of each module by reviewing the "Objectives" and the "In this activity you will" sections.

Core competencies for peer training:

- **HIV/AIDS:** HIV life cycle, medications and resistance, risk and harm reduction, and treatment adherence
- **Communication Skills:** stages of change, listening skills, open-ended questions, cultural awareness and non-judgmental behaviors
- **Peer Role:** workplace expectations, boundaries, confidentiality, counseling, navigating the health care system, working as part of a clinical team, communicating with providers, readiness to be a peer, and self-care
- **Putting It All Together: Jeopardy:** a comprehensive, interactive Jeopardy game using PowerPoint that covers skills from all three core competencies. [Jeopardy PowerPoint](#)

Other modules

- **Activities**—this section includes introductions, energizers and closures that help facilitate group interaction and learning, break up the day, and bring closure to the training.
- **Continuing Education**—includes additional training materials to reinforce or supplement the core competencies
- **Case Studies and Scenarios**—includes case studies, scenarios, and role plays separated from the training modules so that trainers may mix and match them based on the needs of the peers.

BUILDING BLOCKS TO PEER SUCCESS

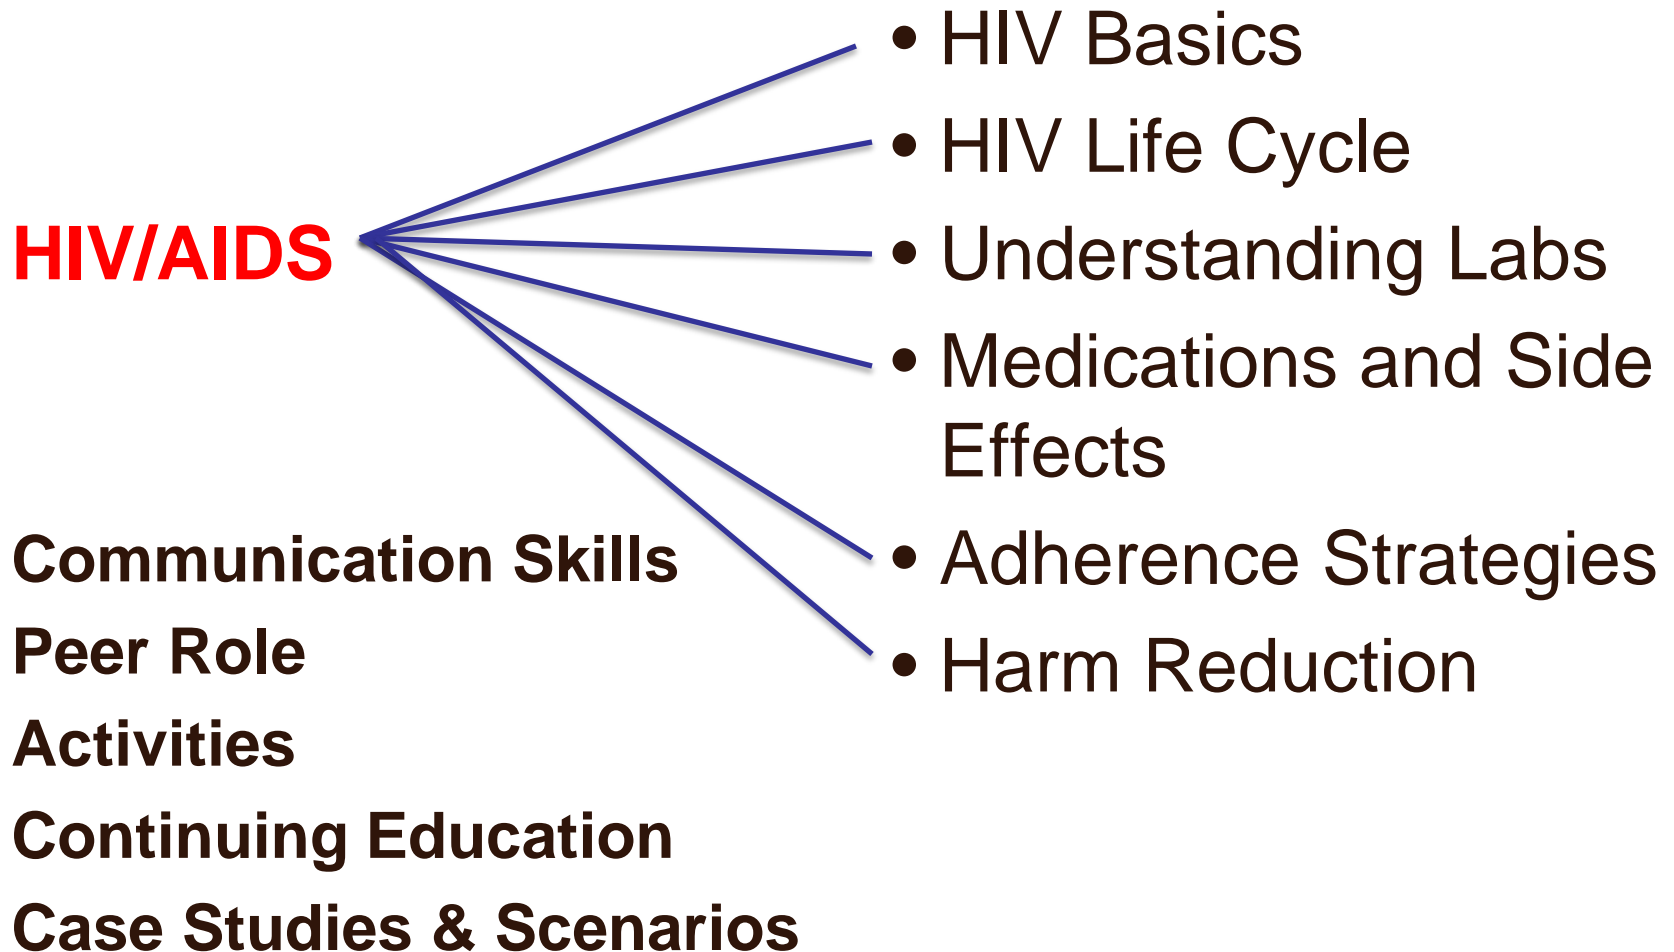

Core Competencies

- HIV/AIDS
- Communication Skills
- Peer Role

Other Modules

- Activities
- Continuing Education
- Case Studies & Scenarios

BUILDING BLOCKS TO PEER SUCCESS

BUILDING BLOCKS TO PEER SUCCESS

Medications and Side Effects

- Understanding Drug Resistance
- HIV Medications
- Ask the Expert: Fighting the Virus Role Play
- HIV Case Studies
- **How Medications Work Activity**
- Stump the Peer

Harm Reduction

- Play it Safe: Intimacy and HIV
- Play it Safe: Prevention Demonstrations
- “Let’s talk about sex” Icebreaker
- Prevention Education and PLWHAs
- Safer Sex and Harm Reduction

Core Competencies: HIV/AIDS: Medications- Side Effects & Resistance

HOW MEDICATIONS WORK ACTIVITY*

▶ ABOUT THIS ACTIVITY

- ⌚ **Time:** 25 minutes
- ➡ **Objectives:** By the end of this session, participants will be able to:
 - Identify the 7 stages in the Viral Life Cycle (AFRI-TAB - Attachment, Fusion, Reverse Transcription, Integration, Transcription, Assembly, Budding);
 - Identify the 5 different classes of HIV medications;
 - Recognize HIV terminology used in HIV treatment;
 - Understand why HIV medications are used in combination and why one must be adherent to meds for them to work.
- ★ **Training Method:** Individual Activity, Large Group Discussion
- ✓ **In This Activity You Will...**
 - Distribute and lead activity "How Medications Work" (10 minutes).
 - Ask participants to share what medications they take and where they work to slow down replication (10 minutes).

Instructions

Note: This session should come after a session on the Viral Life Cycle and HIV Medications.

Talking Points

Now that we've gone through the Viral Life Cycle, the 5 classes of medications and we've showed you where those medications work at slowing replication of the virus at all stages. Let's pull out the HIV drug medications chart and check off the medications that you currently take.

1. Give each participant two handouts; HIV Antiretroviral Agent – Drug Chart and the Medications at Work in the HIV Life Cycle. The HIV Antiretroviral Agent.
2. Participants (specifically participants on HIV medications) will be asked to look at the list and put a check beside the medications they are currently taking.
3. The participant will then identify the stage where their medications are working in the Viral Life Cycle (AFRI-TAB).
4. 3-4 participants will be asked to volunteer to give the following information from the drug chart:
 - Name of HIV medications they are taking;
 - Identify which of the 5 classes the medications are in;
 - Identify the stage where their medications are working.

HOW MEDICATIONS WORK ACTIVITY

ABOUT THIS ACTIVITY (CONT.)

Materials:

- Handout – HIV Antiretroviral Agent Drug Chart
- Handout – Medications at Work in the HIV Life Cycle
- Handout – Side Effects and Possible Treatments

Preparation:

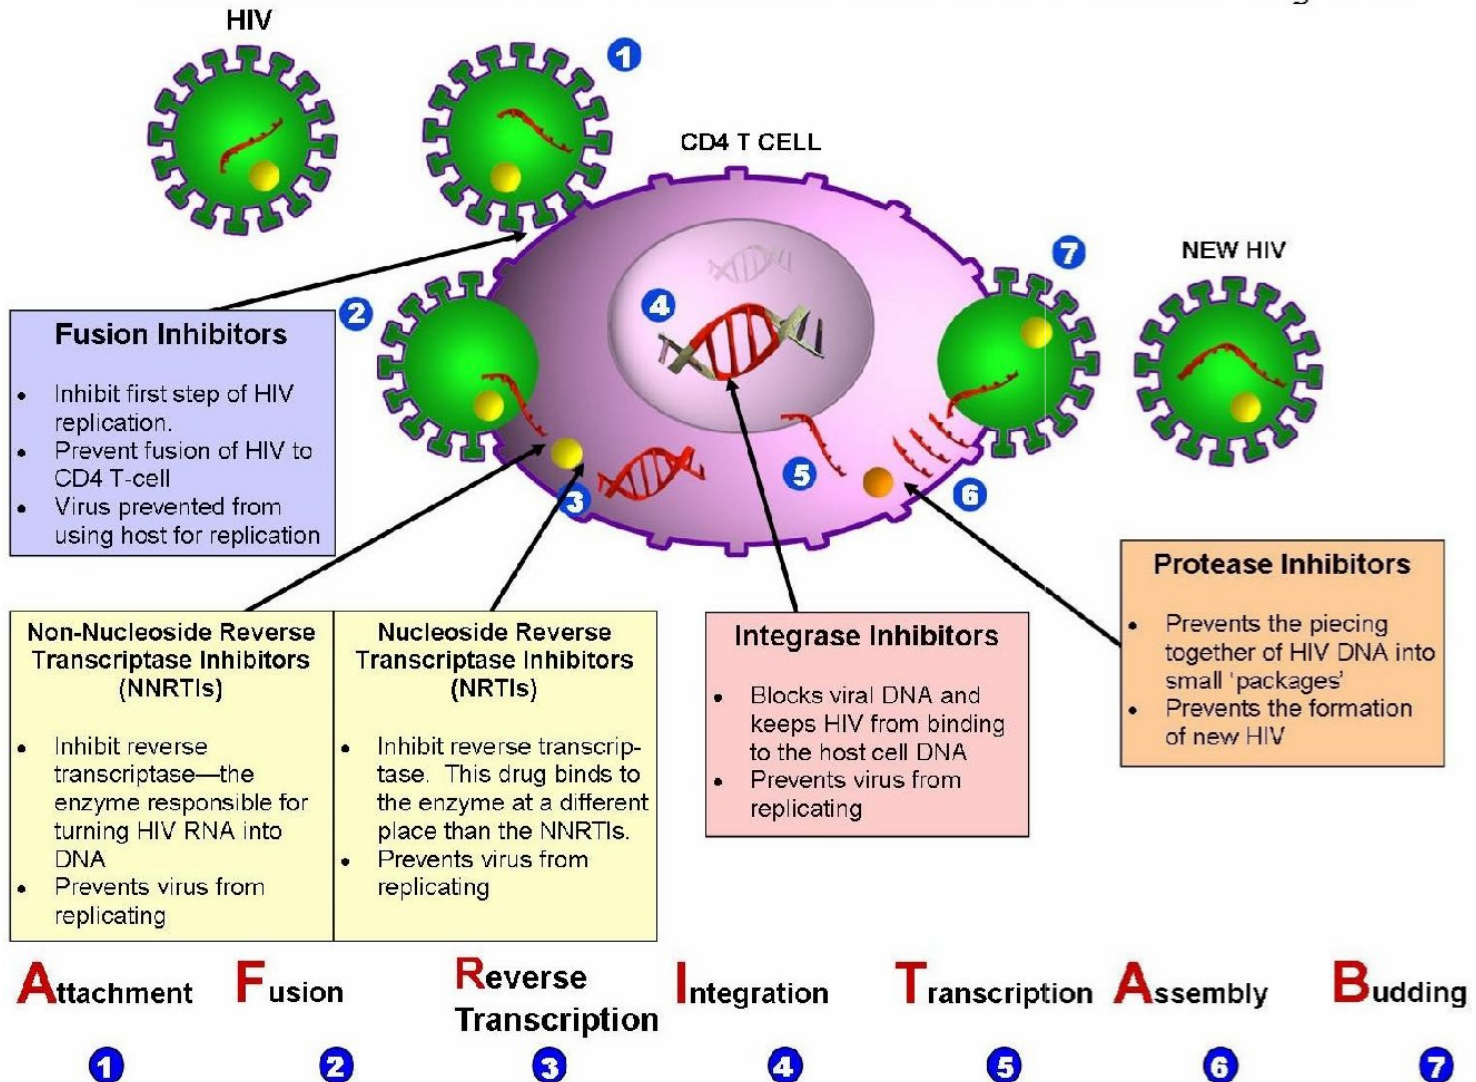

- Obtain drug chart from a pharmaceutical company or web resources such as acria.org or aidsmeds.com. Be sure to obtain most recently updated version of drug chart for every training session.
- Print handouts

- Are there certain levels of medications that must be maintained in the body?
- Since the fusion inhibitors block the door to the cell, why isn't this drug prescribed first?
- There are a number of medications now approved by the FDA, are there other meds on the way for people that have taken everything and nothing works – have no options?

Summary

Now with this knowledge you have power to influence those that you work with to be adherent to their regime or if they are not on meds to explain the role of the different classes and how it is significant to treatment.

Medications at Work in the HIV Life Cycle

BUILDING BLOCKS TO PEER SUCCESS

Communication Skills

- Active listening
- Attentive listening
- Barriers to learning
- Motivation to learn
- One and two-way communication
- Pushing all the buttons
- Asking tough questions
- Expressing yourself
- Nonverbal communication
- Responding to conflict
- Communicating with providers
- Communicating health information
- Counseling exercise
- Delivering culturally competent health care

Building Blocks to Peer Success

This section includes activities that help facilitate group interaction and learning, break up the day and bring closure to the training. The intros help to lay out the ground rules and allow participants an opportunity to get to know each other and build trust. Icebreakers help to engage in a participatory manner and energizers are a fun way to re-invigorate a group after a serious discussion or after a break in the day. It is also useful to plan in advance how each training will end, the closures allow participants to summarize key points, review major "take home" lessons, or transition to the next topic.

Other Modules - Continuing Education

Building Blocks to Peer Success

The modules in this section are provided as supplements to the core competencies for peer training. The information can either be used to build upon previously learned materials or offer new insight into topics and issues that may be relevant for a peer's role. The modules include information on health-related topics such as comorbidities and sexual health, working with special populations, and important subjects such as stigma and dealing with crisis. These modules can be included in an introductory course or orientation for newly hired peers and can also be offered at subsequent trainings or reunion meetings.

Jeopardy

- Who says learning can't be fun?
- Games can be used to summarize what has been learned and even evaluate if training has gone well
- Jeopardy is one example
 - Instructions are given for host, timekeeper, judge, and players
 - Expect participants to take competition seriously
 - Run the game fairly according to agreed rules

Jeopardy

Jeopardy

- We prefer to use Jeopardy after people have learned the content in the 6 question categories
- The game can be a summary of what has been learned and help you evaluate if certain content areas still need to be clarified
- *REMEMBER: you can change questions and answers – or create new categories – to meet your needs*

Creating a 3-day training on Adherence Support

- Holistic: Think about all of the skills that are needed to provide adherence support
- Objectives: What would you like participants to learn from this training?
 - Pick activities/modules that teach skills that you fit into your objectives
- Evaluation: How will you evaluate your training?

Module Selection Tool
