Interviewer Script: *Thank you for continuing to participate in this study. Today we are going to cover many topics, including your health, your needs, and your experiences with HIV health care. Some of these questions may be about things you’ve already discussed with other people at [NAME OF ORGANIZATION]. We are asking you again because this interview is part of a national study that includes people living with HIV from different parts of the country. The data we collect in this survey will not be shared with anyone providing services.*

Everything I ask you in this interview is confidential. We would like you to feel comfortable, and be as honest and open as possible. None of your answers will be linked to your name, so please be candid. We hope this study will help us to improve care for people living with HIV.

If a question makes you feel uncomfortable, or brings up feelings or situations you want to talk about, we can refer you to someone you can speak with. Also, if there are any questions you don’t feel comfortable answering, you don’t have to answer them.

This interview will take less than 1 hour. If at any time you would like to take a break, please let me know. After each question I will read you response options to choose from. As I go through the questions, let me know if there is anything that is unclear. Are you ready to begin?

Interviewer note: *DO NOT READ the response option “Refused” to the participant. Only mark this response if a person chooses to skip a question.*
